Global, National, and Human Security: Reflections on the Next Decade

9th Annual Security Symposium - April 2-3, 2018
SUB Ballroom A

U.S. is upending international agreements and is setting new directions which are impacting global, national, and human security. Some key concerns include: cyber disruption, nuclear proliferation, terrorism, migration, governance and the rule of law, climate change, and deteriorating human conditions. All in the UNM community are welcome - please come.

Monday April 2
